Exploratory Teachers

Our high school introduced the new state approved exploratory teachers program this year. This program is considered one of the most effective experiences for attracting students to teaching. While observing and assisting a master teacher the student gains a better understanding of the role of the teacher and of his aptitudes for teaching. High school seniors with average or above scholastic records, and with definite plans for college may enroll in this program. It is a two semester, full credit, course. The exploratory teachers change areas and levels at mid-term.

3. Functional, which involves those reading activities that are the natural accompaniment of daily classroom activities.

III

One of the Purposes of the School Is:

To help the child become an effective, well adjusted, contributing member of a democratic society. A stimulating program in reading is necessary if this goal is to be achieved. The second grader should become an independent reader. To do this he must learn to analyze words, to pronounce them correctly and to check the accuracy of his analysis through the use of the word meaning and context. He must learn to use the phonetic principles which he has been taught in the first and second grades.

He must learn that getting meanings from the printed symbols is as important as pronouncing words.

It is important that he learns to tell what he reads in the proper sequence.

In numbers, he must continue to count by two's, learn the one hundred addition facts, also the subtraction facts. He should learn to say the facts quickly without the use of "crutches" of any kind.

Learning to tell time should be mastered in this grade, it has been introduced in the first. Knowing the value of each coin is important. Learning liquid measure is necessary.

He must also learn to work written problems that take some reasoning on his part.

During his study of Language he should learn the days of the week, the months, and the holidays.

He should learn the different kinds of sentences, how to write sentences, write original stories, friendly letters and invitations.

It is very important for him to become a good listener. He should choose good books to read.

Other instruction includes cursive writing, spelling, science, and health.

Music and art are also taught.

If he does all that has been mentioned and learns to work and play harmoniously with all the other students, he will become a good third grader the next year.

We learn to add three numbers, to carry, and to borrow. We use the Law of grouping and Expanded Notation. The Multiplication tables through the fives and division through the fives are learned. Sets, subsets, and three place values are a part of the learning pattern.

The study of Health is a continuous story including the senses, healthful eating, cleanliness, proper clothing, safety, and the body itself.

Reading and phonics are correlated although separate texts are used. We have a reading vocabulary of about 500 new words. We also learn to use the dictionary in the back of our readers. The class enjoyed a trip to the Museum of Science and Industry in Chicago. The students enjoyed seeing how the other people live and breathe.

In Social Studies we had an imaginary trip all over the 50 States and actually each wrote a letter to the Governor of each state, asking for all the information upon each state.

SIXTH GRADE OBJECTIVES

The Language Arts program continues with the progress of basic skills that have been presented in the grades preceding the sixth grade, both in the oral and written work.

Reading advances pupils' previous knowledge of vocabulary and fluency in both silent and oral reading. Pupils must continue to comprehend and understand the reading materials. We work toward reading achievement to that level which is considered appropriate to the ability of the child. Dictionary and encyclopedia work is stressed. Libraries should be used to fullest extent.

Language should be a well-balanced program for both oral and written activities. The basic structural composition of good sentences is emphasized. Our newer methods use the linguistic approach. This has to do with patterns of structure which also helps in the teaching of the parts of speech. Creative writing is an important phase of the language program.

Spelling is an advanced continuation of skills in learning to spell and use words correctly. The workbooks include many exercises to improve in all areas of spelling.

Improvement in handwriting is a constant aim. Legibility, along with ease in writing is stressed.

Grade Six

Row 1. Donna Long, Robert Borns, Sandra Fase, Jeff Grevenstuk, Cheryl Beckefeld, Cindra Gross, Annette Koselke, Dan Lewis, Julie Barker. Row II. Mrs. Hanley, teacher, John Christopher, Mildred Jacobsma, Dwayne Gibson, Milvina Ashley, Patricia Justice, Jeff Cooper, David Fieldhouse, John Britt, Rickie Justice. Row III. Arithmetic extends the basic addition, subtraction, multiplication, and division with whole numbers, fractions, and decimals. Some work is done in other bases, mathematical sentences (working for the unknown), and brief work in beginning geometry. Per cent work is introduced. Pupils need to develop ability in computation with numbers in practical situations. The ability to interpret and solve all types of story problems is important.

Social Studies is a fused course. It is a study of OLD WORLD LANDS (EASTERN HEMISPHERE). The history covers rather generally the beginning of life since the caveman to the modern times of the twentieth century. A spirit of appreciation for history is an important aspect of teaching in the area. Current events (generally a daily discussion and a weekly special with our "YOUNG CITIZEN" Newspaper) adds greatly to the history part of our Social Studies. The geography helps pupils to understand how man lives in different environments throughout the world. This helps to show how the advantages and disadvantages of different areas of human occupation and use, are related to such natural forces as landforms, climate, and resources. The more specific studies will be encountered in later education.

Music and art help to develop appreciation and enjoyment for the finer and more cultural aspects of human growth and development.

In all areas of school work at this level, we are striving for social adjustment and behavior appropriate to his age group, as well as the academic achievement.

Prophecy

On May 18, 2000, the members of the class of 1969 were chosen by Jim Nagel, President of the United States, to transfer the town of DeMotte to the moon. This was to be done because the Secretary of the Population Explosion, Pat Jacobsma, had reported that the DeMotte area was extremely overcrowded. The "Moon Express," piloted by Bob Bormann and co-piloted by Ron Bormann, was to transport the people to "Moon Valley."

At the first town council meeting on the moon, Keith Hamstra was elected mayor, and his loyal supporters, Janet Odle and Chris DeVries were appointed his ever-helping secretaries. Larry Gibson and Danny Hayes were appointed town marshals because of their swiftness at the "draw." The council contracted Mike Holmes as sanitary engineer to transport his "Little Red Wagon" to the moon. Jan Mosier and Phyllis Woudema were employed as garbage collectors. Donna Barker, Cheryl Terborg, and Charlene Moolenaar were employed as meter maids because of their ability to see red. Ron Kamminga was appointed as the local street cleaner, due to previous experience. Nance Stellingwerf was elected the first Justice of the Peace of Moon Valley, although she had no previous experience.

The editor and publisher of the Moon Valley Post is Roy Hough who is always on top of the news. The sports editor is athletic Dave Cron. Sheryl DeBoer unveils the new moon, mod fashions in her column each week. Doug Hamstra reports the weather from his elevated position. Shiela Eeningenburg and Karen Roorda head the gossip column with juicy bits of news. Margaret Kampenga, the food ideas editor, shows us how to make tasty dishes from moon fruits and vegetables.

Since Steve Spraggs is a better bicycle-peddler than an automobile driver, the Western Union has employed him to pedal Mary Christopher around the moon community to issue her singing telegrams.

Dennis DeYoung, the local banker, keeps our "moon-ey" safe and sound.

The local beauty shop, frequented by Sue Bozell, Ardy Rients, and Dianne Raguse, is efficiently operated by Bob Swanson.

The grocery store, run by Alan Conrad, had its problems trying to keep the shelves stocked.

The bookworm, Connie Hoffman, became the librarian because of her ability to say "sh-h-h-h."

The great team, Phil and Pat (Thomas) Crane who had studied at Mayo Brothers, opened the local medical clinic.

Moon Valley's ham and egg factory was owned and operated by Edna Belstra.

On the corner of 1st and Main stands Stan Musch's gas, Dave Caldwell's clean-up, and Jim Wahl's wax service station.

Beverly Moolenaar and Debi DeYoung deliver flowers to Moon Valley Funeral Home, operated by Jim Hart.

Trish Starkey and Karen Wallin are the Pizza Queens at Dan Anderson's Dutch pizza palace.

Betty VanSchepen and Eric Boon are seen daily carving wooden shoes at the local wooden shoe factory.

The "Moon Shine" is run by prohibitionists Marvene Barker and Dave Sytsma.

Carol Tesky finds her delight in painting pictures of stakes.

At Moon Valley High School, Nancy Gilbert teaches Spanish in perfection. Donna Nees and Linda Leach are the expert instructors of the new course "Government-Made-Simple." Mike Orsburn is the Driver's Education instructor, and he manages to teach some of the best means of "get-a-way." One of the less important men in the work of the school is Tom Sullivan, who is head of the Busdrivers Anonomous Association. Dan Mitchell is the drum MAJOR in St. JILL'S Marching Band.

Dave Dykhuizen soon acquired a reputation as being the town bum in DeMotte.

Mike Kenning is the Secret Service Agent Number 1969 who operates in the DeMotte area.

DeMotte's "American" cheese mine is run by the truly patriotic original Apollo 8 astronauts: Michele Gross, Jan Nuss, and Noralene Sanders.

Dave Takacs, leader of an expeditionary force to the dark side of the moon, has not been heard from since the moving and relocation of DeMotte.

Two members of the class of 1969 were left back on earth. Ellen Wilkie was in the WAC's still trying to keep up with Danny, and Linda Thomas has prospective ideas of becoming a "King."

ON THE BANKS OF THE WABASH

By Paul Dresser

Oh, the moonlight's fair
Tonight along the Wabash,
From the fields there comes
The breath of new mown hay.
Through the sycamores
The candle lights are gleaming,
On the banks of the Wabash
Far away.

That's the farthest we've ever been away!

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The United Nations World Food Programme (WFP) has been instrumental in this regard, and has been successful in increasing the number of people who are receiving food aid from 100 million in 1980 to 150 million in 1995 (WFP 1996).

One of the main reasons for the increase in the number of people who are undernourished is the increase in the number of people who are living in poverty. The number of people who are living on less than \$1 a day has increased from 1 billion in 1980 to 1.2 billion in 1995 (World Bank 1996).

There are a number of factors that contribute to poverty, and these factors are often interrelated. One of the main factors is the lack of access to land and other resources. This is particularly true in developing countries, where the majority of the population is engaged in agriculture.

Another factor is the lack of access to education and health care. This is particularly true in developing countries, where the majority of the population is living in rural areas. This lack of access to education and health care leads to a cycle of poverty, where people are unable to improve their living standards.

There are a number of ways in which the nutritional status of the world's population can be improved. One of the main ways is to increase the number of people who are receiving food aid. This can be done by increasing the number of people who are eligible for food aid, and by increasing the amount of food aid that is provided.

Another way is to improve the nutritional status of the world's population by increasing the number of people who are engaged in agriculture. This can be done by providing people with access to land and other resources, and by providing them with the necessary training and support.

There are a number of other ways in which the nutritional status of the world's population can be improved. These include increasing the number of people who are engaged in non-agricultural activities, and increasing the number of people who are receiving education and health care.

It is clear that there is a need to improve the nutritional status of the world's population. This is a complex task, and it will require the cooperation of many different organizations and individuals. However, it is a task that is worth pursuing, as it is one of the most important ways in which we can improve the lives of the world's poor.

The United Nations World Food Programme (WFP) is a leading organization in the world that is dedicated to improving the nutritional status of the world's population. It has been successful in increasing the number of people who are receiving food aid, and it is continuing to work towards this goal.

There are a number of challenges that the WFP faces in its work. One of the main challenges is the increasing number of people who are living in poverty. This is making it more difficult for the WFP to provide food aid to the people who need it most.

Another challenge is the increasing number of people who are living in rural areas. This is making it more difficult for the WFP to provide food aid to the people who need it most. However, the WFP is continuing to work towards these goals, and it is confident that it will be successful in the future.
